To Settle An Issue

There are few people in Western Canada, and in the east as well for that matter, who will not follow with lively interest the proceedings before the Commission appointed by the Saskatchewan Government to inquire into all the circumstances of the "On to Regina" trek to relief camp strikers, which started out from Vancouver over land and culminated in the Dominion Day rioting in Regina, in which a city police detachment lost his life and scores were injured.

The inquiry, which is to be held in Regina may be regarded as an event of major importance to the whole country, in view of the fact that charges have been made public that the purpose and intent of the movement was to upset the constitutional government of Canada and to impose on the country a government by lawlessness.

This has been denied by the strikers' leaders, who have insistently declared that their purpose was to secure and demand the attention of the people to their grievances and the attention of the Federal government and the people in the hope that by these means grievances would be remedied.

Which is correct, the charge or the denial, the people at large have no means of knowing at the present time, but it is sincerely to be hoped that sufficient evidence will be brought before the Commission to settle the question.

The charge, of course, is serious one, since, if true, it involves a serious threat to the democratic form of government which has been bequeathed to the people of Canada and has been carefully fostered and cherished by them since Confederation. The whole trend of the history of the country since 1867 has been a bulkhead of unshakable form of government which deserves at all costs to be preserved, the people they defend.

On the other hand, if there is no truth in the charge, the public is entitled to know it. During their advance through the provinces of British Columbia, Alberta and Saskatchewan as far as Regina, the young men making up the way to Regina gained a measure of sympathy and support from a section of the public.

Those who assisted the lads on their trip to the capital in the belief that it was a peaceful delegation to supplicate the government to terminate their grievances, whether those grievances were real or fancied, will want to know whether their confidence was misplaced or not.

It is to be hoped that the strike will be brought to a successful venture as the strikers progressed through the western provinces, as is alleged many of them did on the assumption that it was a peaceful and law-abiding pilgrimage, will also want to know whether they were bound on an innocent pilgrimage or were unwilling and pliable tools in the hands of a masterful hand, as it were.

These are matters which should have cleared up definitely and finally for the sake of the peace of mind of the public generally and for the information of the participants in the march and of those who sympathized with them and aided them.

It is to be hoped, too, that the Commission will be given full information and that it is all those who have specific information on the movement and its motives to come forward and offer their testimony without fear or favor. Such information, no matter what it may be, provided it is reliable, will, it is safe to say, be welcomed by the Commission and the public.

It must be borne in mind that the Commission is purely a fact-finding body. It is not charged with the duty of drawing conclusions from the evidence adduced, or of making recommendations as a result of the information it receives.

The Commission's duties are confined to bringing out whatever facts they and their counsel may be able to ascertain, and, while no doubt every effort will be made to gather as much information as possible, value of the Commission's work to the public will be limited to the extent that such information is made available.

If those who have important information on the subject matter of the inquiry failing to bring it to the Commission's attention, to that extent the investigation will necessarily fail to fulfill its full purpose and to that degree the inquiry will be disappointing.

No matter how economically handled a Royal Commission inquiry is bound to involve considerable expenditure and it is to be hoped that those who have information of value will submit it and help the public to secure a good return for the expense entailed.

Prime Minister Joseph G. Coates announced completion of arrangements with Pan American Airways for flights between the United States and New Zealand. The service is understood to be scheduled for initiation next August with flying boats.

The Aztecs used chocolate beans for money, and only the upper classes were permitted to drink chocolate.

Triumph For Science

Milk Dead Cow With The Aid Of Mechanical Heart

By means of an artificial heart the udder of a dead cow has been made to yield milk. Dr. W. E. Petersen, University of Minnesota scientist, disclosed recently.

Dr. Petersen devised the artificial heart to aid him in studying the fat content of milk.

He said it fed to a new and better test for butter fat. The new test is known as the Minnesota Babcock butter fat test, a refinement of the Babcock method, the scientific assertion.

It enables accurate testers to save time and effort.

Dr. Petersen set on one occasion he kept an udder "alive" for 15 hours, and milked it five times during that period. This was accomplished by connecting the circulation of blood through the gland by means of the mechanical heart and utilizing the animal's lung.

The lung also was kept active for the same length of time as the udder, said Dr. Both were affected to the mechanical heart.

The mechanical heart is a revolving disc with an iron arm on each side. The arms are parallel but just out from the disc at different angles. The heart is driven, supplied by an electric motor, the arms passing rubber tubes through which the blood flows.

This gives the same pumping effect as the heart in a living body, Petersen said. At first efforts were made to keep the udder alive merely with the mechanical heart but the attempts were unsuccessful because the blood deteriorated from lack of oxygen.

Dr. Petersen then added a lung taken from a freshly slaughtered cow. It was inflated and deflated by an automatic air bellows. Before the lung was added the udder would almost black, he said. When it was circulated through the lung it came out a normal color.

To keep it at body temperature, the blood is passed through a glass coil immersed in warm water. Thirteen pounds of blood are used.

Illuminated Highways

Cars Without Lights—Traffic Signals Received By Radio

Illuminated roads on which motor car lights would be unnecessary, were envisaged by A. T. V. Robinson, deputy secretary of the Canadian Society of Civil Engineers, at a recent meeting of the engineering and psychology sections of the British Association, which mainly dealt with road traffic problems.

It may be that within a decade or two the more intensely trafficked roads, the approaching driver will see an oncoming vehicle, not as a couple of spots of dazzling light with a black background, but as a dark silhouette against an adequately illuminated road.

The advances of recent years were still all dependent on their efficacy upon the general perception by the driver of a road vehicle and his readiness to respond.

"The road driver of the future will have traffic signals on his car radio set," said Mr. Robinson.

A careful driver approached a railroad; he stopped, looked and listened. All he heard was the car behind him crashing into his gas-tank.

The term mandarin is applied in China by officials to government officials of every grade.

There are said to be 1,110 different kinds of animals and insects in the British Museum collections of varieties of insects, including 120,000 types of spiders, 50,000 types of flies, and 40,000 types of beetles.

"Panacea," the popular own newspaper, an unprinted newspaper from all parts of the world, since the first issue appeared recently in Belgrade, Yugoslavia.

If you've never used QUAKER NATURAL BRAN — you really don't know how delicious bran muffins, cookies, etc., can be! For Quaker Bran is especially intended for baking. Use it with a natural bran and it gives you that real home flavor, mixed with bran lightly. And it is more economical to use than prepared bran.

Quaker Natural Bran, besides making delicious muffins, cakes, etc., corrects constipation and helps keep well. There's a recipe folder and a valuable coupon in every package.

Extensive Travelling

Journalist Covers 1,250,000 Miles, Always Going Eastward

A man has come to Durban, Natal, who is 22 days younger than any man of 40 in the world. He is Mr. M. Franklin Kline. Eleven years ago he set his face to the sun and he has travelled towards it ever since, completely lodging first the Northern and then the Southern Hemisphere every year. He has thus travelled the world 22 times in 11 years, and, as he has always travelled east, 22 days have been clipped off his life. "I've travelled 1,250,000 miles in my life, always east," said Kline, "and have never been tired. There are so many too many interesting things to see. Anyway, I guess I'm wound up now and can't stop." I'm the editor and compiler of the official guide for ship passengers, "The World's Most Popular Ports of the World," published by the Osaka Shōsen Kaihatsu Company, Japan. I visit all the big ports of the world every year, meet the heads of business firms and interview them. I am also an expert in ships, writing and compiling my guidebook, which is published every year. I was born in Tennessee. I came to South Africa in 1904 and found a job in the mines. When the Zulu rebellion broke out I joined the British Army as a Transvaal volunteer. I used to be real fighting in those days." Mr. Kline became a journalist after the rebellion, and when in Japan he conceived the idea of writing a shipping guide-book as a means of travelling round the world. This was so successful that he has continued travelling ever since.

Requests for Dionne Bowls

Premises Have Been Given To People All Across Canada

That the Dionne Quintuplets are very popular in the provinces of the Dominion of Canada is amply demonstrated in the tremendous demands for the "Dionne" bowls and cups which are given away as premiums in connection with Quaker Oats. Although it is only a comparatively short time ago that literally thousands upon thousands of requests for the bowls have been received from families all over the Dominion. Requests for premiums, according to the Quaker Oats Company, have come from every province of life, high and low, and from both men and women, as well as children.

The premium offer of chromium bowls featuring the famous babies in intaglio on the bottom, and their handles carved around the bowl, is being much sought after, and the Quaker Oats was chosen by the best experts in the field.

The bowls are made of porcelain and are ideal for serving the breakfast cereals the children. The Dionne Quintuplets have been eating Quaker Oats regularly since their very earliest days.

Quaker Oats was chosen because of its high quality, richness and taste.

By Food Editors of leading publications are constantly printing articles stressing the importance of this meal because of its abundance of body-building minerals, protein, protein, and energy-making carbohydrates. So the "Quints" get their Quaker Oats regularly since their very earliest days.

Prominent Writer Dies

Frank Leigh Wills Authority On Canadian Affairs

Widely known as a lecturer, writer and authority on Canadian affairs, Frank Leigh Wills, died in Toronto after a brief illness.

He was born in Burford, Ont., and was educated at the public school there. After a period of secretarial and publishing work in Canada he came here in 1906 and became secretary to Hon. A. H. Hardy, first provincial secretary and later Ontario premier.

Later he became editor of the weekly newspaper, Canadian Advocate, in St. Catharines, and Westgate, author of "A Specimen Spinsters," in 1892. She died in 1906.

In 1908 he married Annie Louise Ladd, daughter of George Ladd, president of the Canadian Bank of Commerce. He travelled through the British Isles and Europe in succeeding years and in 1920 became Canadian representative of the Save the Children Fund, an international organization sponsored by the League of Nations aimed at alleviating distress among women and children.

Brilliant Ceremony Marks Inauguration Of Lord Tweedsmuir

Quebec.—Fifteenth governor-general of Canada since Confederation, Lord Tweedsmuir, statesman, soldier and author, was sworn into office here in a dazzlingly brilliant ceremony which inaugurated a regime that will continue for the next five years. The legislative council chamber, where he was furnished the setting for many such functions, presented an appropriate setting for the event.

In the course of his greetings of the country, His Excellency swore-fidelity and allegiance to King George, that he would "well and truly serve His Majesty in the office of vice-gerent and commander-in-chief of the Dominion, and administer justice," and that he would serve the king as keeper of the great seal.

Selected from the three banners, Canada's famous canvas which adorns the whole length of the chamber wall, His Excellency, garbed in brilliant uniform whose silver epaulettes and riband of the Order of St. Michael and St. George, shone in the flash of the many colored lights that played upon him, heard himself praised by Prime Minister W. L. Mackenzie King as a man of high courage and lofty ideals.

Half of Canada, the prime minister declared, "in His Excellency and Lord Tweedsmuir 'the warmest welcome.'

"It is a delight to us to welcome, in Canada's newly-appointed government," said Mr. Mackenzie King, "one who is a statesman and who is known throughout our Dominion, and one who is the personal friend or acquaintance of a very large number of its citizens." In reply His Excellency expressed his appreciation and confidence—admiration for what the people of Canada have done, and confidence in what they will still do."

Doctor Was Lucky

Wins Sweepstakes Prize, But Wins Convalescence Instead.

Toronto.—Good fortune which came to Dr. Herbert H. Murray by holding an Irish lottery sweepstakes ticket on Finalist, third in the Cambridge races, staked him a New Year's gift of \$1,000. He cashed the physician's plan, he said. The ticket, half of which he had won, was worth about \$49,100. "My job is taking care of sick people," he said, adding that now he had "a little money" he would not have to press his poorer patients for payment.

Asks For New Tax Deal

Edmonton.—Proposed conference between the federal government and Alberta cities at which the latter will ask for a new deal in taxation and responsibility for social services, will have to stand over until the provincial-federal conference at Ottawa, Premier Aberhart told Mayor Clark.

Bank Deposits Up

Ottawa.—The weekly statement of the Bank of Canada for the week ended October 26, an increase of \$4,279,603 in Dominion government deposits, while deposits by chartered banks were up \$3,647,694.

Supreme Court Will Decide On Validity Of Legislation

Ottawa.—Submission of legislation to the supreme court of Canada, as announced earlier by Prime Minister King, will be much wider in scope than previously expected, it was learned yesterday.

In addition to the measures respecting working hours and wages arising from draft conventions of the international labor offices, the royal commission on employment and social insurance, legislation adopted to carry out the recommendations of the royal commission on price spreads and mass buying and the Monks Act.

Hon. Ernest Laprade, minister of justice, indicated the reference will ask "certain questions which have been raised regarding the validity" of the following acts:

The Employment and Social Insurance Act, the Dominion Trade and Industry Act, the Natural Products Marketing Act (1934) and amendments, an act to amend the criminal

Says Italy The Aggressor

Co-Author Of Kellogg-Briand Pact Denounces War Policy

St. Paul, Minn.—Frank Kellogg, co-author of the Kellogg-Briand pact that declared "that the United States in common with other countries can and should designate justice as the end sought by all nations in the exercise of the sovereignty of another nation."

He added the United States should "denounce Italy's violation of its treaty obligations and announce that we will take no step to interfere with or nullify the measures that other nations are now taking to put a stop to this war."

"What some of the American people seem to have forgotten is that the Italian people, who have government seem to have entirely ignored," Kellogg said, "is that when Italy invaded Ethiopia and thus, beyond a shadow of doubt proceeded to use war as a means of settling a dispute of war, Italy violated a treaty with the United States and thus violated the supreme law of our land!"

He referred to the Kellogg-Briand pact, Kellogg expressed the hope that the United States will remain true to Italy with Italy will have it home to them constantly that in supplying oil, cotton or machinery they are aiding and abetting a nation that is treating sovereign treaty as a scrap of paper."

Alberta Liquor Prices

Increases Are Announced To Go Into Effect At Once

Edmonton.—With increases up to 25 cents on a 20-ounce bottle of vodka, 20 cents on similar bottles, 15 cents on beer and 10 cents on Canadian gin, 25 cents on the more costly liqueurs and five cents on a dozen bottles of new, new prices at Alberta vendors' stores will go into effect, it was announced.

Alberta's liquor situation in red ink: "Prices quoted in this list include an assessment for relief pay."

The new list, however, shows steep reductions in the prices of brands imported in the bottle. One brand drops from \$4.00 for a 20-ounce bottle to \$3.30. Another brand shows a reduction from \$5.65 to \$5.10.

Increases of 10 cents or more run from five to 10 cents a bottle.

The increases go into effect following an announcement by Premier Aberhart that he hoped to raise \$300,000 by this method.

Woman Senator Injured

Senator Fallis In Hospital With Broken Wrist

Ottawa.—Senator Eva Fallis of Peterborough, Ont., second woman member of Canada's upper chamber, was in hospital since Oct. 18, suffering from a broken wrist and a foot injury.

Dr. Stanley F. Service, her physician, said she was not seriously hurt, but had broken only one bone in her wrist and a bone in her right foot. He said she slipped off the curb and fell.

THE MAN BEHIND THE SCENES

Ontario Hotels Closed

Charged With Being Connected With Brewing Corporation

Toronto.—Beverage-room doors of 19 Ontario hotels, charged with being connected with the brewing corporation of Canada affiliates, were closed on the order of Premier Mitchell Hepburn. Beer and wine sale authorities were suspended.

Mr. Hepburn's orders issued for a meeting of the cabinet which considered a report of liquor commissioner Edmund G. Odette. The commissioner and officials of his department opened an investigation into alleged "tied" hotels two weeks ago.

Fourteen of the affected hotels operate in Toronto and the remaining five in other parts of the province.

The prime minister and the cabinet decided that the operation of the hotels was definitely linked through McPharlin Investments, Ltd., with breweries that were affiliated with Brewing Corporation of Canada. The brewer will remain in the hotel, he said, until such time as the hotels involved are sold or otherwise disposed of and new management satisfactory to the liquor commission, are established. He said, "The new managers must not be connected with the brewing trade."

Test Validity Of Laws

Social Legislation To Be Submitted To Supreme Court

Ottawa.—Social legislation passed at the last session of parliament will be submitted to the supreme court of Canada for a decision as to its constitutional validity. Prime Minister Mackenzie King stated recently:

"Those who are considering a court decision on the matter ready for presentation to the Dominion-provincial conference which Mr. King hopes to have late in November."

Mr. King did not give any detail as to the particular statute to be submitted to the supreme court but it is assumed they will include those dealing with the minimum wage, maximum hours of work, old age rest in seven and the unemployment insurance act, most of which, while supported by the opposition, were challenged by them on constitutional grounds.

Quebec Elections

Voting To Take Place On November 23th

Quebec.—Quebec's 18th legislature was dissolved and Nov. 23 will be the date of the election.

Premier Tachereau made the announcement following a cabinet meeting.

The last general elections in Quebec were held Aug. 24, 1931, and Premier Tachereau had not waited until next year to be so determined, before holding another.

Premier Tachereau has headed the government since 1929 when he took the Liberal leadership following the retirement of Sir Louis St. Laurent. The Liberal party has been in power since 1897.

Toronto Tuners

Ottawa.—Suspension of work on the \$1,000,000 Toronto Island tunnel project while it is reviewed by the Dominion government is "part of a general policy of retrenchment," said the Canadian minister of public works, who said the government will proceed without delay to look into the project.

Floods In Honduras

SEEKS PRESIDENCY

Herbert Hoover, former President of the United States, is reported to be preparing to enter the forthcoming Presidential contest in the hope of defeating President Roosevelt.

Performs Before Royalty

Eclectic Dancing Of U.S. Comedians Please King And Queen

London.—The eclectic dancing of Will Mahoney, United States comedian, entertained the king and queen and the rest of the audience at a royal command performance in the Palladium.

Herb Marston, former President of the United States, is reported to be preparing to enter the forthcoming Presidential contest in the hope of defeating President Roosevelt.

The king looked remarkably well. Queen Mary was a pale green gown, ornamented with large paillettes, a cloak of pale green satin and a diamond necklace with a magnificent emerald in the centre.

Will Take Holiday

Former Prime Minister Bennett To Take Much Needed Rest

Ottawa.—Former Prime Minister Bennett who resigned with his government on Nov. 23 will be on a two weeks' vacation extended holiday, the first he has taken well.

Mr. Bennett will go to California where he will be engaged in a series of lectures at Calvary West and elsewhere.

He will make the announcement following a cabinet meeting.

Mr. Bennett will go first to California where he will be engaged in a series of lectures at Calvary West and elsewhere.

Breeding Field Corn At Brandon

Experiments Carried On For Over Fifteen Years

At the Dominion Experimental Farm, Brandon, Manitoba, corn breeding studies have been in progress for more than fifteen years. All attention was given to earliness. By continually selecting ears from early maturing plants, a very early strain was produced. However, this strain possessed several undesirable traits, such as being tall, having the dwarf type and produced too many suckers, and the ears were borne too low on the stalk. Improvement of the strain is being accomplished through the application of a new and a modern ear-to-row system.

In the former, lines are established

by inbreeding or self-pollination for at least four or five generations.

These inbred lines are then mated with other inbred or open-pollinated plants yet they are valuable in fixing or establishing certain desirable characters. When inbred lines are crossed, the progeny in many cases is more vigorous than open-pollinated plants and gives greater yields both in ears and seed.

The ear-to-row system is a mass breeding proposition in which the rows from ears making the best strain are selected and used as male parents. All other rows have the tassels removed as soon as they appear, so that all pollination is by the few selected male rows. In 1932, ears were gathered from twelve hundred selected plants. In 1933, the test was increased each year and inferior lines eliminated. In the 1933 test only seventy remain and of these the best twenty-seven are used as parents for 1934.

Modern improvements have been

made in respect to height of plants, suckerling and height of ears. Concerning the latter, the ears are borne well up on the stalk, few being less than two inches from the ground.

To gain extra height of plant, it has been necessary to sacrifice a few days in earing, nevertheless most of the best lines are still sufficiently early to mature under average conditions at Brandon.

Personality Operation

Removal Of Part Of Gland Causes Many Different Things

A new personality, which cures things like bearded ladies and dictates for husbands was described for an American college of surgeons recently in the course of an annual meeting at San Francisco.

The operation removes a little of the adrenal gland, the structure which supplies the extra energy for muscle and for fighting. This gland lies near the kidneys and does not say thing directly to do with sex, yet strangely is the cause of upsets in masculine and feminine personality traits.

It is one of the endocrine, or ductless glands which work in series like electric lights on the same circuit. The researches which led to discovery of the operation for personality were conducted by Frank Hinman, M.C., of the University of California medical school.

He said studies of the endocrine disclosed some of the puzzling intermigrations were due to the one section of the gland, called the suprarenal cortex.

When this cortex gets too active in a child before birth, it can cause a switch in sex. After birth sex cannot be altered, but this cortex possesses the power, if it becomes overactive, to affect personality at any period of life.

Automobile Accidents

Death Toll In United States Reaches Large Figure

The World Health Organization counted 1934's automobile deaths but at 33,680, a fifteen per cent gain over 1933 and "a new all-time high."

It averaged the death-rate at 36.9 persons out of every 100,000. In 1933, the rate was 23.7. In 1934, in addition, 1,750 persons were killed in collisions between automobiles, railroad trains and street cars.

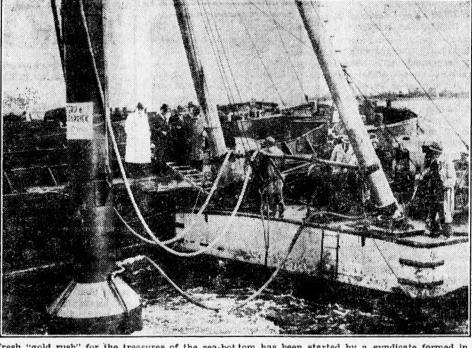

After figures covering 56 major cities for the 52 weeks ended Sept. 28, have indicated the death rate was continuing upward in 1935.

"Ah, Mr. Perkins, I believe you have my nephew working at your office?"

"Not to-day. It's the first ball game to-day, and he's gone to your funeral."

A municipal hotel where the poor can get a bed for the night for two coppers—less than one-half of a Canadian cent—has been opened at Hankow, China.

PREPARING TO SEARCH FOR THE GOLD OF THE SPANISH ARMADA

A fresh "gold rush" for the treasures of the sea-bottom has been started by a syndicate formed in Holland which hopes to raise bullion valued at many millions of dollars from the ships of the Spanish Armada which are lying on the bottom of the sea in the Bay of Tobermory, Scotland. Here is a picture of a small model of a new naval salvage apparatus invented by the Dutch engineer W. van Wieren, which will be used during the salvage operations. This apparatus consists of a big tub giving entrance to a wide diving-bell which is illuminated and has communication by telephone with the ship above water.

World Distance Record

Use Special Constructed Experimental Craft For The Trip

A world distance record for sea-planes was claimed a short time ago by six United States navy flyers after a 3,387-mile non-stop flight from Panama in a newly designed ship.

The twin-motorized craft, commanded by the navy's distance flyer, Lieut. Commander Kneffel McGinnis, glided to a landing at Alameda, Calif., at 2:21:15 p.m. (5:21:15 E.S.T.) 34 hours and 51 minutes from Panama.

McGinnis and his crew made

Commander McGinnis said he believed the flight from Panama would better the seaplane distance record held by Mario Spofforth, Italian flyer. The record is 3,061 miles, made in a flight last July from Malfalcone, Italy, to Berbera, British Somaliland.

To be considered a record, the mark must better the Italian's record by 100 miles.

The seaplane is an experimental craft which utilizes new principles in design. It has pontoons which form wing tips while in flight and are dropped into landing position before safely alighting.

A whale tail is constructed to avoid damage in rough water landings. The body is below the wing and a navigator can sit in an open cockpit for observation.

Find Soil Worth Money

Keio, Japan, may get an unexpected windfall in the sale of soil being excavated for the foundations of the new city hall and the leveling of the site. It was originally intended to use the soil, which is very sandy, for a new prison.

But the soil, but an engineer of the local Leodolosky Engineering Corporation in Geneva, who was instrumental in the proposal to outlaw bombing planes was defeated."

R. R. Zaphiro, secretary of the Ethiopian legation, unveiled the monument.

A cubic mile of water contains

more than 1,100,000,000 gallons. And there are about 327,672,000 cubic miles of water in all the oceans of the world.

THE REMAINS OF THE NICHOLS PLANE AFTER THE CRASH

Wreckage of plane

This twisted framework above is all that remains of the giant 22-passenger plane which crashed at Troy, N.Y., causing the death of Captain Harry Hulbitch and serious injury to Miss Ruth Nichols, noted aviatrix. Four other passengers were slightly injured.

Two Clever Women Workers

One Specialized In Mine Lighting The Other An Engineer

Miss Monica Maurice, a blonde, with the slender, sleekly groomed outline of the moment, beautiful composed features and smiling eyes is the modern "lady engineer" in lamp-making. She has for four years been responsible for the planning and operation of lamps at collieries in England.

She does much traveling in the mines and often sits in her driving car of average of 22,000 miles a year.

She hopes to save much time in the future by flying, for she has just obtained her certificate. She is the first woman in Scotland to do so.

One of her aims is to bring about an international standard for mine lighting.

To this end she has read many papers at international meetings of mining and metallurgical engineers in France and Germany. Her first flight was at 21. She spoke the native tongue in each case and took part in the highly technical discussions.

To prepare herself for her job, she has studied the work of the Paris Sorbonne and Hamburg University, qualified as a shorthand writer and typist in three languages, visited the coal mines of Westphalia, and worked in the shops of the world's largest mining concern in Saxony.

She plays as hard as she works, and is an expert rider, swimmer and dancer. Her favorite recreation is what she calls "week-end acrobatics."

Another remarkable woman is Miss Venetia G. H. Parker, 40, English mechanical, metallurgical, locomotive and marine engineer with several patents to her name.

One of these, the Holmes poppet valve, is used in Diesel engines. Another is incorporated in all modern locomotives.

Her chief job is the testing out of new materials for patents to insure their practicability. She is one of a handful of people qualified to do this highly specialized kind of work.

Super Traffic Policeman

Device Cuts Period of Waiting Or All Vehicles

A new wonder of traffic control has made its appearance in London.

It is called an "integrator." It is a sort of super-traffic policeman in a little box. It could be heard faintly ticking through its metal cover.

This accelerated speed cannot be restricted to England, and one may force the day when Edinburgh will bring within six hours of London.

Some of the most modern types

will doubtless have become subject to the new locomotive, "Silver Jubilee," to run between King's Cross and Newcastle, to cover the distances at an average speed of over 67 miles an hour, or 107 m.p.h.

Flying helmets and goggles

are being withdrawn for preservation as relics in their original form at St. Rollox Works.

Some of the most modern types will doubtless have become subject to the new locomotive, "Silver Jubilee," to run between King's Cross and Newcastle, to cover the distances at an average speed of over 67 miles an hour, or 107 m.p.h.

Five rare pieces of Worcester porcelain, only "discovered" through an expert to discoverer, have lain for more than half a century.

Henry A. Bulwer, The pieces, featuring a rare old design, stated to be unavailable even at the Royal Porcelain Works, Worcester, are worth more than \$600.

Of the practically unknown "feather" pattern, the pieces were turned out by the famous factory at the time the shadow of Napoleon was falling across Europe. They were

never shown to the public until spring present by his grandfather, and were never shown to the public until last spring when they were included in a loan exhibition of Worcester ware.

U. S. Population

Prediction Is Made That It Will Not Increase After 1960

The New Dealers predict a static population for the United States by 1960.

After another quarter century, the population of the country is expected to grow, causing upsurges in the economic and personal affairs of the nation's citizens, according to the National Resources Committee, a body created by President Roosevelt to "plan" the future of the country.

The committee based its conclusions on reports from various state planning boards.

The national committee made no attempt to estimate the total population of the country, but pointed out that with no further increase in the buying public, progress after 1960 will depend on raising living standards. Birth rates will cease to decline and aged persons will fill places in industry now filled by youths, according to the forecasts.

"The New Dealers report that their studies indicate that following future developments:

that the population of the United States will become stabilized about 1960;

"that future population distribution will depend in large measure upon the development of the country's natural and industrial resources;"

"that during the next 25 years, the proportion of the population over 60 years of age will be approximately one-third."

"that the number of young people under twenty years will decrease in about the same amount as those over 60 will increase;"

"that characteristic of world population will change and that, as the mechanization of agriculture and industry increases, opportunities for employment in such new fields as education, conservation, recreation and service occupations will increase."

Canadian Dressed Poultry

Large And Increasing Shipments Being Made To British Isles

There are indications, especially for Canada, dressed poultry in the British Isles this year.

From January 1 to September 30, 1935, a total of 2,331,165 pounds of chickens, fowls, ducks, and geese were shipped from the Dominion, compared with a total of 322,000 pounds for the corresponding nine months of 1934, and 437,500 pounds for the similar nine months in 1933.

The "integrator" will shortly be installed, whether in a different place or not.

Briefly this is what it did one day in Gloucester, Pl. W.—a road much used by private cars avoiding Baker St. to reach Marble Arch from J. Wood's. Lights are installed in Gloucester Pl. at the blind cross.

It apparently contracts the number of vehicles in "areas" although some of them are half a mile distant and hidden by tall buildings.

The "integrator" will shortly be installed, whether in a different place or not.

A door-knob is a thing a revolving door goes round without

Regular Aeroplane Service Across the Atlantic Appears To Be Nearing Realization

Prediction by Dr. Alexander Graham Bell shortly after the Wright brothers made their memorable first heavier-than-air machine flight at Kitty Hawk, North Carolina, that a regular aeroplane service across the Atlantic would be operated during the present generation appears to be nearing realization.

Another important part of the prophecy, as far as Cape Breton is concerned, is that plans for a ocean service may call for a landing field at Sydney.

It is believed that Sydney is greatly favored to be the terminus on the Atlantic seaboard.

Word from Montreal is to the effect that work is being rushed across Canada for completion of the trans-continentals so that European passengers may be able to land there and a half day's wait in the St. Lawrence city next year and less than five days from Vancouver.

Single unemployed men are constructing 114 landing fields across the Dominion, and these will be used as part of a gigantic unemployment relief program. Most of these fields are nearly completed now.

Should the transatlantic service be developed, it is believed Montreal would be the main eastern terminal, with aeroplanes connecting there to the western routes. Maritime stops would probably be at Halifax, Fredericton, Moncton and Saint John.

The Canadian airline will fly from Montreal to Elmsdale by way of Ottawa. Elmsdale, where a radio beacon is being operated will be the junction point for aeroplanes from Toronto and southern Ontario, British Columbia and also planes for points near Cobalt, Kapuskasing and Sioux Lookout, all in northern Ontario. Winnipeg, Brandon, Regina, Flin Flon and Letchbridge will have bases, and a feeder line will connect with the Arctic air mail routes from Little bridge.

Approximately 12,000 men have been employed on the airway construction plan. They are housed in camps and receive regulation rations.

Sydney's city council appointed Mayor S. E. Muggah as a committee to gather all the possible evidence to establish a transatlantic base being established here. One of the chief advantages Sydney has to offer is that it is the only place on the Atlantic coast with sufficient landing space that is relatively free from fog or weather.

Aged Farmer A Knight

Has Made Numerous Priceless Gifts To His Local Community

A farmer's insight has been found in Stockholm. For a long lifetime of devotion to the study of Swedish antiquities, a Swedish farmer, Old Christoffersson, has made a unique collection of the Old of Sweden. Mr. Christoffersson, now 70 years old, still recalls studying his first archaeological book as a boy. Treasured specimens, found in the fields of his Province of Scania were often the only ones he had to show his mother in those days. Since then, from his farmhouse collection, he has made numerous priceless gifts to the historical museums in Stockholm, Lund, and Trelleborg, and has gained fame among archaeologists of Sweden for his unusual knowledge of Scania's ancient history.

Bird Makes A Get Away

It's not a bird that Dr. W. G. Green of Stratford, Ontario, is talking about when he got away—it's a bird story. He had been shooting pheasants, he said, and had been carrying two in a bag for about two hours when he heard a whirr—one made hasty exit from the pocket and flew away.

Average farm values per head of sheep, swine and poultry in 1934 increased considerably, while farm animals showed slightly lower values. Milk cows decreased in value from \$31 to \$29 per head, and other cattle remained unchanged at \$17. Sheep increased from \$4 to \$4.18; swine, from \$8.89 to \$8.86; and poultry from 65 cents to 59 cents per head.

"Jack," said the plumber's wife as he was leaving home on a hurry call, "bring me a jar of cold cream from the drug store when you come back for the tools you're forgetting."

After hen eggs have been incubated four days in China, they are examined and the infertile ones are sent to market.

Storing Farm Machinery

Necessary To Protect Machinery From Ravages Of The Weather

Great care should be exercised at all times to protect the large investment in farm machinery from rapid deterioration. Heat, moisture, wind, frost and direct sunlight are the most destructive elements encountered by farm machinery.

Storage and protection against these deteriorating effects during the inactive life of the machines and has been found by the Dominion Experimental Station at Swift Current, to be the greatest single factor in protection.

The most active period of deterioration is during the season of inactivity. It is important, however, to protect machinery the year around from the elements. Generally, the paint on all wood and metal parts, wherever the original has worn thin, and the removal to a dry shed of all slats, canvases, knives, ploughshares, cultivator teeth, etc., immediately the machine is out of use, will greatly increase the useful life of the implement.

Pack all bearings with the correct grade of lubricant. Cover all exposed metal parts with worn gaskets, paint and rubber. Use a chain wrench or Dremmeller's "wrench-grip" Derby and a \$100 prize. His fertile fence produced the best yield in a field of 27. David Jones was second, loser by a close shave.

The competition was run by the Dumbrell-Hawkes Co., brought out huge hopes with everything from neat Van Dyke effects to uncontrolled coverings bidding for victory on quantity.

Disappearance of entomists who achieved only a dirty face effect was rewarded by consolation prizes.

Bright sunlight and moisture cause the present consumption of beef in Canada per head of population is estimated at 68.66 lbs. (56.09 in 1933), pork and poultry at 74.55 (61.03); bacon and ham, 1.25 pounds (\$3.2 in 1933); poultry, 9.9 pounds; butter, 30.92 pounds; cheese 3.64 pounds; eggs, 22.31 dozen per capita.

The present consumption of beef in Canada per head of population is estimated at 68.66 lbs. (56.09 in 1933), pork and poultry at 74.55 (61.03); bacon and ham, 1.25 pounds (\$3.2 in 1933); poultry, 9.9 pounds; butter, 30.92 pounds; cheese 3.64 pounds; eggs, 22.31 dozen per capita.

Close all seed from drift boxes, make sure that all dirt is removed from plough or one-way disk bottom and that they are well greased before leaving. All straw, grain or hay should be stored in a dry place from binders, combines, separators, cultivators, discs, etc., before greasing and painting for storage.

"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-teen, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Her indulgent father loses all he had, and the girl is forced to leave the city of a simple method of living. At this juncture a letter is received from a man who offers the girl a home on what seems to be impossible conditions.

After much consideration, Cousin Columbine's offer, in a secret and Nancy and her father go to Pine Ridge.

Nancy set out one afternoon to climb the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora follows. She is lost, and the girl comes along the road, driven by Mark Adams, who asks him what way he is going. Nancy asks him to look around, and then goes on to Cousin Columbine's. There Mark has broken his leg, and Nancy has broken his leg, and she finds that he is dead. She starts a public library at Pine Ridge—seems a good idea, but she has to get her parents to send all the books she could spare and all the books she could afford.

Nancy's parents and friends gave their liberal support to her request for a library, and the Adams family gave their support to the cause.

Mark and Nancy Adams, and Nancy's Uncle, Adam, and Nancy's Uncle for the ride, and after Nancy and her mother are caught in a blizzard. Blinded by the snow they collide with a mail truck, which has stalled across the road with its back end facing the oncoming traffic. Their car being wrecked, Jack and Nancy stay with the children and read Jacks out for help in the blizzard. He succeeds in finding help, and Nancy and her mother are rescued. As a result of the exposure Nancy's feet are badly frozen and she has to have both feet—both—of them removed.

Now Go On With The Story

CHAPTER XXI—Continued

"You sound 'lady' or one branch of it says you sound like a man's name, but you're not a man's name. You're a shade less bright, less energetic; and Nancy hated to think how lonely she would be left with only Aurora Tubs for company. She was living with General Grant as she undressed one night, "it would solve the difficulty. What's the use of being a great general, anyway? If you're incapable of being a general, you're not a general." Nancy had not yet come to the realization that Miss Columbine, who had come in unobserved, "that you were in a lot more danger of being a general. Don't talk nonsense, Aurora Tubs."

Nancy laughed at the time, even though something told her that in a measure Aurora was right. One pays for having a general, and Cousin Columbine had not yet come to the realization that she was a shade less bright, less energetic; and Nancy hated to think how lonely she would be left with only Aurora Tubs for company.

"You mean I was living with General Grant as she undressed one night, 'it would solve the difficulty. What's the use of being a great general, anyway? If you're incapable of being a general, you're not a general.' Nancy had not yet come to the realization that she was a shade less bright, less energetic; and Nancy hated to think how lonely she would be left with only Aurora Tubs for company."

Father Adam looked up with a smile.

"When we get home," Jack prophesied, watching his sister's rapid countenance with some amusement.

"Nancy, you and your friends with stories of pioners in Colorado and storm the hills—no literature on the subject?"

Father Adam looked up with a smile.

"At that case, I've a little book by a young Englishman, which I'll present to you, Nancy. It's worth reading."

"You mean the fellow who made the world? Come along up through Mexico and camped for a time at South Park—Bayon Salade, they called it then?" asked Matthew.

His father nodded, and went on: "I wish I could recall something one of the western poets wrote about him."

"Along through dusk he sat— Safe in Bayon Salade above the Plateau."

Safe from the rumbling dust to Santa Fe.

Cool in the woven sprouts that curved curtain day."

John Adam paused, and to the surprise of every one, Matthew, dreamy eyes watching the river, continued:

"While good Fanducho browsed along the sage."

Beyond the picket fire, it was an age.

Of picket fires.

Brook's tail was good Better than dripping hump-rls, —cedar wood,

Was good for snapping, crackling bright,

Along the boy, Bayon Salade, and Mattie, Nellie."

There followed a moment of appreciative silence as Mattie ceased speaking. Then Luke exclaimed with admiration: "Gee! brother how wise Nancy, reading that you have a special Mattie, a salt-connoisseur, has returned again, tactfully drew attention away from him by asking:

"Did any of those old, old Spanish expeditions come this way?"

"I couldn't say, my dear," responded Cousin Columbine. "They may possibly have passed near Pine Ridge, though, that, I believe, has not been proved."

And no one dreamed that the girl who sat there, lost to the present in visions of other days, was to discover what looked astonishingly like the missing proof.

CHAPTER XXII.

It was on the fourth of July when Jack announced at breakfast that with their departure only two days away, the time had come to tackle the task of getting a car.

"You can't put me off another hour," he insisted (when the old lady said: "Mother those posts, Jack, don't waste your strength on 'em"). "I'm two posts away, that is, before the day is over."

Cousin Columbine then took to these days early and Aurora's cooking; and those posts give me the heebie-jeebies. If there were time I'd like to have you go with me, too."

"You don't have to go with me, forward to when you come again," she responded, endeavoring to speak briskly. "I hope your father will consider John Adam's offer of a job for the winter, Jack, and send you back to him when you come again."

"I don't think still the house will seem with her. I felt like a lost soul the days you stayed at Prairie Ranch."

After the visit to "Uncle Tom's" was over—three days that had softened the memory of those cruel, wind-swept plains, leaving instead a vision of flower-dappled prairie, a stack of newspapers and letters. Miss Columbine had stowed them in her trunk; "that whole ghastly experience would seem a dream."

"A nightingale, I call it," she retorted. "A nightingale! I call it! I had two posts down 'sides that blizzard, and as for Miss Columbine, she'll never be the same woman again. It's my opinion that if Eve and John Adam had been here, the two of them would have driven down here to keep her company; she'd have lost her mind."

"And it's my opinion," related Miss Columbine, who had come in unobserved, "that you were in a lot more danger of being a general. Don't talk nonsense, Aurora Tubs."

Nancy laughed at the time, even though something told her that in a measure Aurora was right. One pays for having a general, and Cousin Columbine had not yet come to the realization that she was a shade less bright, less energetic; and Nancy hated to think how lonely she would be left with only Aurora Tubs for company.

"You mean I was living with General Grant as she undressed one night, 'it would solve the difficulty. What's the use of being a great general, anyway? If you're incapable of being a general, you're not a general.'

But if the General saw a solution of the problem, he kept it to himself, and the days passed with Cousin Columbine looking a bit grim when they were together. Nancy was afraid that Adam losing his appetite to an extent that alarmed his troubled mother. And now tickets and reservations were ordered, and Taylor had planned to travel to London to watch over the Adelphi Library; and Nancy was conscious of a new sensation, something she described to him as "a sinking feeling, a sinking feeling, a sinking feeling."

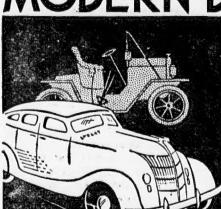

But if the General saw a solution of the problem, he kept it to himself, and the days passed with Cousin Columbine looking a bit grim when they were together. Nancy was afraid that Adam losing his appetite to an extent that alarmed his troubled mother. And now tickets and reservations were ordered, and Taylor had planned to travel to London to watch over the Adelphi Library; and Nancy was conscious of a new sensation, something she described to him as "a sinking feeling, a sinking feeling, a sinking feeling."

She was relieved when Jack announced that he had secured a job. The task would occupy his time and thoughts till afternoon, when they were to have a farewell supper at the Adams ranch.

"I'll be back about Jack," she said to Cousin Columbine. "I'll help with the digging. Let's get to work before the sun's too hot."

The old posts, rattled off with little difficulty.

MODERN DESIGNS GIVE GREATER EFFICIENCY!

RIDE THE HIGHWAYS FOR TEN MINUTES behind the wheel of a 1935 streamline model and you'll marvel at the advances in motoring pleasure.

RIDE THE AIR WAVES FOR TEN MINUTES with an Eveready Layerbilt hooked to your radio receiver, and you'll enjoy the same delightful sensation of scientific achievement.

Space-wasting round cell construction has gone into the discard.

Today, flat cells compactly built layer upon layer, bring you a modern power plant, packed with sustained energy and long life.

Study the comparison

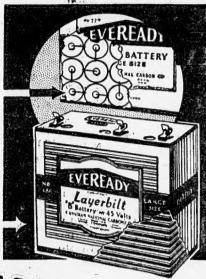

below, then make sure of gaining this new and greater measure of radio enjoyment.

Old-Fashioned Round Cells

Note the waste-space and the multiplicity of delicate wires.

MODERN Construction

Not an inch wasted — all tightly packed on layer, the maximum of power in the minimum of trouble.

Anticipating Death

Night Of Person To Take His Own Life In Certain Circumstances

The right of a person to take his own life, in certain circumstances, would be legalized under a bill presented by Lord Moynehan, a member of the House of Lords.

Lord Moynehan's bill, introduced by Prof. A. T. Baden, head of the College of the Pacific Chemistry Department at Stockton, Calif.

The bill, if passed, would be known as the "crime" in England.

Under present law, certain members of the clergy are said to regard Lord Moynehan's bill as a "crime."

Thursday, Nov. 21st, 1935

The local ice-skating season
opened at the rink on Saturday.

Gordon Brodie is on the con-
valescent list for a few days.

The Curling Rink has been
undergoing repairs this week.

Mrs. H. Shannon, arrived in
town on Wednesday night from
Alder Flats.

The last two days has seen a
noticeable let-up in the cold
weather we have been experi-
encing.

Bill Stothers, who underwent
an operation for appendicitis
on Tuesday, is reported to be
making favorable progress.

Dave Lush, M.L.A., left on
Saturday morning to attend
the caucus of Alberta Govern-
ment members at Edmonton.

The regular meeting of the
Hospital Aid will be held at the
home of Mrs. A. K. McNeill on
Tuesday, November 26th, at
2:30 p.m.

Mr. Milligan, who was pre-
viously located here in connec-
tion with the Relief Dept., is
reported has been re-appointed
to a higher position with the
Provincial Govt. in connection
with this work.

An impromptu dance staged
in the theatre on Monday even-
ing afforded enjoyment to a
number of trippers of the light
fantastic. The dance had the
ear-marks of a midnight frolic
as it was past 11 p.m., before the
dance was on its way. In
spite of a few short contingencies,
pleasing music and the spirit of
social goodwill made a merry
time for all attending.

Here's To You

miles, 13.08, 18.08

Montgomery—France, roads,
miles, 15.82.

Leech—Edwards, do, days,
1.00, miles, 19.04, 20.04.

That accounts for Relief In-
demnity to be paid as under:

Leech—Montgomery, do, re-
quest, miles, 6.24; F. C. Dahl,
Committee meeting, 1 day, 29
miles, 3.25; E. Francis, 1 day, 3
miles, 1.25.

Arnold—That accounts of W.
Brodie for 1 hour to Mrs. M.
Hughes, 1.55 and A. C. Map-
ham, 3.00, be not by emergency
relief orders.

Francis—That assessment of S.
W. 128, 27 3/8 be altered to
Great West Life, Winnipeg.

Montgomery—That applica-
tion for free freight on cattle
be referred to the Dep't. of Agri-
culture.

Leech—That a vote of thanks
be passed to all who assisted in
the distribution of the Gift Cars
of Vegetables recently sent into
the municipality, and to the
Churches and other organiza-
tions for the help given by
them. That attention be also
drawn to the fact if any persons
who received these vegeta-
bles and who could have af-
forded to pay for same with the
recognition of the work of the
organization that sent them in and
pass on the helping hand to
others who are in need, they
may do so by forwarding dona-
tions to be used in meeting the
expenses of the organization
and the purchase of gift cloth-
ing to be sent out by them.

Any donations, large or small
will be very gratefully acknow-
ledged and used for these pur-
poses by W. W. Champ, Volun-
tary Relief Committee, Regina.
We have all been helped—it
is hoped that those able to do
so will pass it on in this way
to others less fortunate than

themselves. A contribution was
gathered up and forwarded
from the members of the Coun-
cil.

Arnold—That the following
Resolution be forwarded to Hon.
J. G. Gardner, Minister of Agri-
culture, Ottawa:

Haematuria

The appearance of blood in
the urine haematuria, is never
normal. It is always dangerous
to ignore it. Painful haema-
turia is a warning signal of the
greatest importance. Blood in
the urine may mean a growth
in the bladder.

Haematuria is not to be thou-
ght of as a normal change; it
is normally known that there is
blood in the urine. The amount
may be very little, and it may
appear only once or twice and
then disappear. Failure to heed
such a warning is inexcusable
when it is known that this may
be the only sign of a dangerous
condition.

It is just as true of cancer of

WARNING TO RADIO LISTENERS

the bladder as it is of cancer of
other parts that the hope of
cure lies in bringing the case under
treatment early in the disease.
By early, we mean while the
growth is still confined to one
part, before it has spread, while
it can be removed or entirely
destroyed.

We do not know the cause of
cancer. As it attacks the
bladder, it is much more common
in men than in women. It is a fact
of great importance that cancer
of the bladder may be preceded
by a benign or harmless tumor
which, after months or years,
for no apparent reason, may turn into a malignant or
cancerous growth.

It is obvious that if the benign
tumor is recognized and removed,
then it cannot develop into a
dangerous growth. This is
a further reason why the ap-
pearance of any blood in the
urine should be investigated be-

cause the benign tumor may
reveal its presence by causing
bleeding.

Fortunately, cancers of the
bladder do not, as a rule spread
to other parts as quickly as do
certain other cancers. This is
not to be taken as an excuse for
delay in treatment, but rather
as a note of hope that prompt
and proper treatment is likely
to be more successful in dealing
with the disease as it appears

in the bladder.

Methods of diagnosis im-
prove. By means of an instru-
ment known as the cystoscope,
the inside of the bladder may
be inspected. This is very sat-
isfactory, but is of no real value
unless the patient comes at a
time when something can be
done to cure the disease.

Haematuria (blood in the
urine), no matter how slight
the amount, is a sign that
should never be disregarded.
